Acknowledge

As we understand that the eProject is a step-by-step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. laddered approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank to our professor and others student for the addorable supports during the time in project.

Beside serveral mistakes we had made in the project, we hope to have more oppotunities to widen our knownledge in web developing world.

We also thank you so much for your infomation and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group 01.

Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JavaScript but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

The website (in this project) is a tool that brings everything in the world to you such as historic monuments information natural knowledge or skill in technology...

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back *eprojects@aptech.ac.in* as the assigned schedule.

Design Plan: Smart Store	Document Name: Problem Definition	SWD/Form No. 01/PD/Ver1.0
Effective Date: 10-01-2022	Version 1.0	Page No: 1 of 28

Problem Definition

In the current 4.0 Era, with rapid advancement, buying a house has become a rather difficult task for young people. To adapt, they've switched to apartments and motels, and as of the result, household utilities are gaining more and more attention. One of which, is a wardrobe. Not just a regular wardrobe, nowadays from a bed, designers have made built-in wardrobes with beds, sofas, etc. Incorporating like this is extremely important because rooms in this day and age are also getting smaller, ranging from 10 to 20 square meters per room in 1 apartment building. The demand for self-build wardrobes have also been rising in the market amongst young people. Self-build wardrobes can help remove the inconvenient shipping process, lets you control the size, height, width of it, be more eco-friendly and can be cheaper than buying a built wardrobe.

Identify the problem

- 1) The website's interface will be Lunar New Year themed
- 2) The home page will show off products with high ratings, including many brands
- 3) User functionalities, such as signing in, signing out, signup, checking your purchase history
- 4) Users can add products into their carts
- 5) Users can look up e-invoices
- 6) Users can check their delivery statuses using a product code provided by the system
- 7) A brief summary of features of the products should be displayed on the Web Page along with the picture but detailed Features should be stored in Individual Word documents which can be downloaded or viewed by the User who wishes to see the same.
- 8) The website will consist of info links of the store
- 9) The menu of the website will show many brief options, the logo, a search bar, store location and any other info the customer needs
- 10) The information will be sorted by brand name, if the customer wants to check the most popular products, then they can click on a link / button / the menu, ...
- 11) When the user picks any specific brand, the list of products for the brand will appear
- 12) When the user searches the products, the appropriate product will appear
- 13) The user can compare many products

Effective Date: 10-01-2022	Version 1.0	Page No: 2 of 28

- 14) A “Contact us” page should also be included to send a review ticket to an administrator and an email address that, when clicked, will open local mail application to send their emails.

Customer

- Can view/product details
- Search products
- Register, log in to the system
- Add to cart
- Buy products
- Compare products
- View purchase history
- Send feedback
- View store information
- Electronic Bills Looking

Limit has not been fulfilled

- Not yet applied database and server handling like functions on the system including: Login, member registration, system admin,...

Customer Requirements Specifications

The Website will be created based on the following requirements

User:

input:

- Member registration data
- System login data
- Send feedback to the admin
- Product purchase data
- Search product
- Search for order code
- Billing code

Process:

- Check registration information already exists or not
- Check login information
- Check information feedback
- Check the product is in stock or not... and some other handling
- Check whether the product search keyword exists in the database or not
- Check order status
- Check billing code

Output:

	Prepared by (Student)	Approved by (Faculty)
	Project Group No: 01	LE THANH NHAN
Signature		
Date		

Design Plan: Smart Store	Document Name: Customer Requirements Specifications	SWD/Form No. 02/CRS/Ver1.0
Effective Date: 10-01-2022	Version 1.0	Page No: 4 of 28

- Do not leave the fields blank, Registration information already exists, Registration is successful, Password must be from 6 characters
- Incorrect login information, Login successful
- Fields can't be blank, send Feedback successful
- Product does not exist, Product in stock is out of stock, Order successful
- No products found, Returns an array of products list
- Order not found, Order status information
- Show billing information, Billing not found

The wireframe shows the 'Compare Products' section of a Smart Store application. At the top, there's a navigation bar with icons for menu, logo, address select, search (placeholder: Enter your search products...), user info (0 123 456 78), shopping cart (placeholder: Shopping cart), order lookup, and member. Below the navigation is a breadcrumb trail: Home / Compare Products. The main title 'Compare Products' is centered above two comparison cards. Each card has a search bar ('Enter your search...'), a central image placeholder (orange square with a mountain icon), a heading ('Heading'), and a text block ('Lorem ipsum dolor sit amet, consectetur adipisicing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.'). A 'VS' circle is positioned between the two cards. To the right of the cards is a 'Suggested products' section with four items, each showing a small image, 'Heading', and a truncated text block. At the bottom of the page is a footer with the same text as the card text.

Heading Lorem ipsum dolor sit amet, consectetur adipisicing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. The screenshot displays a user interface for a shopping cart. At the top, there's a header with icons for account, address, search, and cart. Below the header, the URL 'Home / Cart' is shown. A search bar with placeholder text 'Enter your search products...' is followed by a back arrow and the text 'Search product'. To the right, a section titled 'Your cart' shows a product thumbnail (a stylized orange mountain icon) and a summary table with columns for 'Product's name', 'Price', and 'Promotion Information'. Below this, a box labeled 'Choose Promotions' contains three radio buttons. The main form area is titled 'Purchase information' and includes fields for 'Name' (with an input field and a placeholder 'Email'), 'Note' (with an input field and a placeholder 'Phone'), and two large buttons: 'Online Payment' and 'ORDER'. At the bottom, there are four placeholder sections labeled 'Heading' with placeholder text: 'Lorem ipsum dolor sit amet, consetetur sadipscing elitr, sed diam nonumy eirmod tempor invidunt ut labore et dolore magna aliqua.' Each placeholder has a small grid icon below it.
